# Now's your chance to vote on: "Can adults and children learn from each other about the online world?"

Yes

I can show my parents how to use my reading app from school.

Trusted adults give me good advice about what I do online, even though they don't go on the same apps as me.

I think adults and children can always learn from each other about everything.

I don't know enough to show my carer anything about the online world yet.

It is always changing. My grandparents have lots of hobbies already, they don't need to be online.

My parents are not that interested in the online world, so I learn about it from my friends.

No
